High peak hour power prices in China have emerged as the driving force behind a revival in the price of lithium, a key battery metal, which has risen ...

As China hits 1.36 billion kW of new energy storage capacity, the race between lithium-based and flow battery technologies intensifies. Which path will dominate long-duration storage?

The latest action plan came as China's energy-storage sector experiences growing demand from both domestic and international buyers. In the first half of 2025, global shipments of ...

According to Benchmark Mineral Intelligence, around 315 GWh of battery energy storage capacity was installed worldwide in 2025. This figure represents nearly 50% year-on-year growth ...

Battery production for electric vehicles (EVs) necessitates a supply chain capable of supporting the exploitation of a variety of raw materials.

China's exports of batteries and battery energy storage systems (BESS) have hit a record in 2025, soaring by 24% from the year before over the ...

With advancements in lithium-ion, sodium-ion, and flow batteries, along with AI integration and recycling initiatives, China remains the most strategic market for energy storage solutions in 2025 and beyond.

Apparently, China succeeded in its goal of adding more than 65 gigawatt hours of battery energy storage systems in December 2025, which exceeded the total installed in the United States ...

New energy storage, spearheaded by lithium-ion batteries, has seen breakthrough expansion. It now holds a dominant share (exceeding two-thirds) of the total installed capacity and is ...

2025China Energy Storage Lithium Battery

China's new energy storage market reached a milestone in the first half of 2025, according to a report by CNESA at the Western Energy Storage ...
