If you want to change it into parallel operation, you need to set the INVERTER in the display. You should have the service engineering code "XXXX" provided by the service engineer to execution the ...

Before proceeding any work, including maintenance and/or service, on the inverter, fully disconnect it from all DC input, AC grid and other voltage sources. There MUST be a 5 -minute waiting time after ...

Discover the detailed installation instructions for the S6-EH3P30K 30kw Hybrid Inverter and other models by Ginlong Technologies. Learn about mounting, ...

In order to make sure safe running, ask for proper grounding, using appropriate conductor size and providing short circuit protection. Notice! Connection cable ...

Increase the separation between the equipment and the receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an ...

Do not connect the positive or negative terminal of the solar panel to the ground. See Figure 1 for a simple diagram of a typical solar system with this hybrid inverter.

The inverters are designed for indoor and outdoor installation (IP65), to increase the safety, performance and lifespan of the inverter, please select the mounting location carefully based on the following rules:

brid PV System Overview Depending on different power situations, this hybrid inverter is designed to generate continuous power from PV modules (solar panels), b. ttery, and the utility. When MPP input ...

Connect communication cables between the inverters using the RJ45 cable (yellow ethernet cable) in daisy-chain configuration between ports: "Parallel_1" or "Parallel_2" from Master to ...
