EDP supplies a range of racks for use in Data Centre and Logistic environments including a range of server racks and charging cabinets for mobile devices

In this exclusive Q& A, Vicor contends that 400V DC power distribution to AI racks in data centers is inevitable.

Vertiv Network Power's 400V DC power technology can solve your data center and telecom core site problems, helping you simplify your site, reduce costs, and achieve exceptional availability.

The new EcoStruxure Pod Data Center and EcoStruxure Rack Solutions are now available globally. Organizations are deploying AI clusters ...

Designed for edge computing environments, it supports remote locations, branch offices, and industrial sites where space, power, and IT support are limited. ...

To increase compute density and to deal effectively with the prospect of racks that consume up to 140kW or more, hyperscalers are now advocating an evolution to ...

At the 2025 OCP EMEA Summit today, we discussed the power delivery transformation from 48 volts direct current (VDC) to the new +/-400 ...

Currently three companies have worked together to provide a high-level overview of the Diablo 400V architecture. The goal is to standardize items such as, high voltage connectors and ...

The adoption of 400V DC architecture for powering server racks in data centers represents a

400V Data Center Racks for Edge Computing in Central and Eastern Europe

significant evolution in power distribution, particularly ...

Microsoft and Meta have been working on a new open rack design for AI data centers which separates power and compute into different cabinets. ...
