This requires a much higher voltage DC power distribution solution, where power components and battery backup are outside of the IT rack. We are ...

The rapid development of AI has imposed higher requirements for computing power on data centers. To accommodate more GPUs for computing, the architecture of 400V independent ...

In this exclusive Q& A, Vicor contends that 400-V DC power distribution to AI racks in data centers is inevitable.

Google outlines new AI data center infrastructure with +/-400 VDC power and liquid cooling to handle 1MW racks and rising thermal loads.

Currently three companies have worked together to provide a high-level overview of the Diablo 400V architecture. The goal is to standardize items such as, high voltage connectors and ...

This system seamlessly integrates 241kWh of lithium storage with solar power management, delivering a stable 400V AC output. Equipped with intelligent EMS, thermal management, and fire safety, it is the ...

By leveraging our in-house knowledge of DC power, inverters, batteries, generators, thermal management, UPS, alternative and other energy sources, we pay attention to the entire system and ...

The emerging vision is of data center racks capable of delivering up to 1 megawatt of power, paired with liquid cooling systems engineered to ...

Advances in power conversion technologies and increasing use of DC-based equipment at core sites has driven 12V and 400V DC power distribution to become a safe and viable alternative to traditional ...
