---

Designed for remote locations, it integrates solar controllers, inverters, and lithium battery packs to ensure stable and continuous power for telecom equipment, surveillance systems, and off ...

Mini-Telecom Cabinets The Apollo Solar mini-cabinets provide all the electronics needed for smaller systems. Shown on the right: a mini-cabinet for a 500 watt ...

Over 75% of the new telecom infrastructure investments in Asia and Africa today include solar energy components, as indicated by a 2024 GSMA report. And over 30% of them ...

We also offer integrated power solutions for intelligent video surveillance systems and solutions for site sharing of tower vendors. Our solutions simplify site ...

This cabinet can economically house a variety of next generation electronic equipment including telco backhaul, fiber distribution, and radio equipment for wireless applications.

Designed for the next generation of telecom and industrial systems, these cabinets deliver maximum uptime, simplified integration, and long-term performance stability in outdoor environments worldwide.

Telecom operators increasingly use solar energy to meet clean energy targets and support sustainability goals. The table below highlights how leading companies have advanced their ...

By combining solar generation, intelligent battery storage, and diesel generator integration, our solution drastically reduces fuel costs, enhances reliability, and cuts CO2 emissions--helping your operation ...

They transform solar-sourced DC into AC and store unused energy in high-performance battery packs, providing clean, renewable backup energy to mission-critical telecom equipment.
