Our newest IQ8 Series Microinverters are the industry's first microgrid-forming*, software-defined microinverters with split-phase power conversion capability to convert DC power to AC power efficiently.

Featuring Enphase's proprietary ASIC technology and microgrid-forming capability, it efficiently converts DC power to AC power while supporting ...

IQ8X Microinverter is the latest addition to this family, designed to support PV modules with high input DC voltage and cell counts, such as 80-half-cut cells, 88 ...

Part of the Enphase IQ8 Series, this model converts DC to AC at the module ...

The IQ8X-80-M-US microinverters efficiently convert DC power to AC power, thanks to the proprietary application-specific integrated circuit (ASIC) at their core.

IQ8X Microinverter is the latest addition to the Enphase IQ8 family, designed to support PV modules with higher input DC voltage and cell counts, such as 80-half-cut cells, 88-half-cut cells and 96-cells.
