Swiss power producer and energy service provider Alpiq has inaugurated a 30-MW/36-MWh battery energy storage system (BESS) in ...

Alpiq, a Swiss electricity producer, is strengthening its position in the European market with a strategic focus on developing flexible and Battery ...

According to Alpiq, flexible assets such as battery storage and pumped hydropower are essential for balancing variable renewables and stabilising grid frequency. Chevir's 100MW output ...

The energy transition demands flexibility solutions, such as high-performance battery energy storage systems (BESS). These systems can be utilised with great versatility to stabilise the ...

Swiss energy company Alpiq has inaugurated its first battery energy storage system (BESS) in Valkeakoski, Finland, marking a significant milestone in the company's expansion of ...

With the strategic investment in the 125 MW BESS project in Finland, Alpiq is strengthening its position in the Nordic countries and as a ...

What if flexibility could reshape landscapes - not just balance the grid? ? In recent months, we've accelerated Europe's energy transition with new Battery Energy Storage System projects ...

For Alpiq, this project marks its first grid-scale BESS investment, reinforcing its role as a flexibility provider in European energy markets. The system enables Alpiq ...

Alpiq acquires 535MW Navaleo pumped storage project in Spain Alpiq has acquired the advanced-stage Navaleo project in Castilla y Le#243;n, adding 535MW of long-duration storage capacity ...

With its investment in the planned battery energy storage system (BESS) in the German state of Saxony, Alpiq

Alpiq energy storage system

is supporting the efficient use of wind and solar power. The project is being ...
