Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

The previous editions and complete electricity generation and capacity dataset from 2000 onwards are available for download on the Data and Statistics web pages.

In 2024, over 30,000 MW of solar capacity came online, which is a 30% increase in operating solar capacity. An additional 34,000 MW are under preparation, testing, or construction and projected to ...

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

But, what do solar cities do and how do they use their solar power production? At times, solar power plays a pivotal role in urban energy mix ...

Ranking 2nd in the nation, Texas has 48.2 GW installed and is expected to continue to grow 76% by 2030, surpassing California. Over the last decade, industry prices have dropped 42% in Florida, ...

These reports were discontinued; summary data starting in 2001 is now available in the consolidated Electric Power Annual; detailed data is also available in data files on the Internet. Table ...

Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2025, utility-scale ...

The report, *Shining Cities 2022: The Top U.S. Cities for Solar Energy*, is the eighth edition of America's most comprehensive survey of installed solar PV capacity in major U.S. cities.
