Hello, all. I have a unique situation for my base station setup and wondered if anyone could offer some advice. In the past I ran a Sirio CX 455 ...

The GNSS and radio antennas are normally mounted on a permanent structure on the roof of the building, where they are high and clear from obstructions and ...

The layout of the building is the next thing you must be familiar with before starting the design. Between nearby satellite imagery, floor plans, reflected ceiling plans, ...

While the International Building Code, ASCE/SEI 7, and ANSI/TIA-222 do not require positive attachment of roof-mounted equipment to the underlying structure, it may be required by the ...

A better solution is to either buy a base station antenna, or build one yourself, and mount it up on the peak of the roof on either end of the cabin. You can take a ...

Building a new tower or collocating an antenna on an existing structure requires compliance with the Commission's rules for environmental ...

Abstract: In this paper, we present measurements of the electromagnetic rooftop attenuation of gable roofs and tiles as corresponding building material.

For the installation of a radio base station, the operators are reminded to consider the possible effect of radio-frequency radiation on flammable atmospheres due to the diesel fuel oil tank, if any, installed ...

Curtis S.D. Massey discusses the importance for all firefighters and chief officers to be aware of roof-mounted transmission devices and how they ...

Building a communication signal base station on the roof

The solution to this is to install multiple antennas throughout the building - called an "antenna array". The overall technique is called a Distributed ...
