-----

Chinese automaker Chery has revealed a breakthrough solid-state battery module boasting 600 Wh/kg of energy density, nearly double that of ...

In late 2024, Chery announced the development of solid-state batteries, which were planned to achieve an energy density of 400 Wh/kg in the ...

Discover how Chery's sodium-ion battery plans are reshaping EV technology with sustainable, affordable, and innovative energy storage solutions

Chery and CATL are pioneering the field of solid-state sodium-ion batteries, ushering in a future of efficient energy storage. As the demand for ...

Chery's 600 Wh/kg solid-state cell debuts in Wuhu, highlighting breakthroughs in energy density, safety, and long-distance EV range.

SMART Smart electric drive Smart platform-based and integrated pure electric drive. Multi-power drive system, multi-drive combination mode. Motor efficiency ...

After months of secrecy, the company presented its innovation at a recent event in China, describing it as a major leap forward in energy storage for the EV industry.

Chery projects that vehicles equipped with this solid-state technology could achieve more than 1,500 kilometers on a single charge under ...

Chery is the latest automaker to join the solid-state battery race, unveiling a prototype pack that could push an EV's real-world range to 1,300 km (808 miles). We won't have to wait long to ...
