Africa's solar imports from China hit 15 GW in 2025, up 60%. Record growth signals a clean energy boom, but capacity still lags global pace.

Across Africa, Chinese firms are supplying cheap solar panels, building battery factories, and quietly reshaping the renewable energy landscape once led by the US and Europe.

It is an increasingly common sight from North Africa's coast to the Sahel: a continent turning to solar at unprecedented speed. The numbers ...

That is according to a new analysis of China's solar panel exports data from energy think tank Ember. "The take-off of solar in Africa is a pivotal moment," said Dave Jones, Ember's chief ...

The findings show how China's solar industry is reshaping Africa's energy landscape, offering a low-cost, rapidly scalable path towards broader electrification.

(Yicai) Aug. 1 -- Competition in the photovoltaic power industry of some African countries has intensified since the beginning of the year, as more and more ...

A report shows that Africa has emerged as the world's fastest-growing solar market even as global growth slowed last year, driven by a 60% surge in imports of solar panels from China.

Chinese solar equipment has been flooding African markets, partly as a ripple effect of the US-China trade war. It's one of several factors helping ...

African countries are ordering more Chinese solar panels, with imports increasing by 60% in the 12 months through June, according to the ...
