---

LONGi Solar is known for producing panels with high conversion rates, up to 19.7%, and its panels are designed to withstand harsh weather conditions, ensuring long ...

PV Tech previously reported that LONGi Solar had reached a world record conversion efficiency for a P-type monocrystalline PERC solar cell, ...

Longi Green Energy Technology Co Ltd, a leading enterprise in the photovoltaic industry in China, broke the world record on Friday with its new ...

Solar panel efficiency is the amount of sunlight (solar irradiance) that falls on the surface of a solar panel and is converted into electricity. Due to the ...

In November 2022, LONGi set a world record for the conversion efficiency of crystalline silicon cells at 26.81%. And then, LONGi increased this ...

This achievement pushes the boundaries of monocrystalline silicon photovoltaic cell efficiency to new heights. In November 2022, LONGi set a ...

China's Longi Green Energy has set a new world record for crystalline silicon solar module efficiency, according to a certification report from ...

LONGi has been consistently pushing the boundaries of solar cell efficiency. In November 2022, the company set a world record for crystalline silicon cell conversion efficiency at 26.81%.

LONGi's new world record of 27.30% for monocrystalline silicon solar cells, surpassing the previous record of 27.09% announced in December 2024, ...
