In this video, watch as John Park, from Maker Workshop, takes an old treadmill motor and some PVC pipe and in just a short time turns them into a ...

I've taken on a new project involving the conversion of a windmill. We'd like to convert an old Aermotor windmill to generate some small amount of electricity. Were hoping to maybe be able to ...

To make this homemade wind turbine, take one old washing machine motor and some PVC pipe, follow these easy instructions and start making your own off-grid power source.

The induction generator is an asynchronous generator that operates like an induction motor but runs above synchronous speed, converting the mechanical energy from wind, hydro, etc. ...

Using a motor as a generator allows one to convert mechanical energy into electrical energy efficiently. This article delves into the principles behind this conversion, practical methods to ...

I had done this conversion for a potential 12-foot wind turbine, which I haven't had the chance to build. However, after the accident in 2021, I realized it ...

The constant frustration of finding a reliable motor to turn into a generator ends here. I've tested various options, and let me tell you, the key is a motor that balances speed, torque, and build ...

DIY Wind Turbine Using Car Alternator: So its time to try our hands on building a wind generator using a truck alternator. Yup we recently did came across a 24v ...

Imagine you're out in your backyard on a breezy afternoon, hooking up this 120V DC motor to a small wind turbine setup. You give the blades a spin, ...

# Convert wind turbine motor into generator

You can create your own generator using a similar design as the ceiling fan conversion. Instead of having your coils parallel to the axis of the ...
