Despite the recognized role of wetlands in providing ecological benefits for human wellbeing, ~70% of global wetland ecosystems have been destroyed since the 1990s. Further intensive studies revealed ...

Dhaka's wetlands, vital for flood control, biodiversity and livelihoods, are vanishing under urbanisation and climate stress. Restoring them through ...

Restoring Dhaka's wetlands is not merely an exercise in ecological recovery. It is a chance to rebuild the city's capacity to thrive under pressure from climate change and urbanisation.

Hence, the primary objective of this study is to design a large-scale (100 MW) solar power plant for wetland areas in Bangladesh.

The project includes both engineered infrastructure and NbS. The restored jheel (wetland) and Begunbari khal have improved storm ...

The World Bank supported a Solar Home System (SHS) program, and public-private partnership, to build a thriving off-grid solar market. By 2018, the SHS ...

Your reliable partner for smart and affordable solar energy -- Dhaka Solar Ltd. offers customized design, seamless installation, and long ...

Therefore, we are making our first attempt to unravel the historical and future spatiotemporal dynamics of wetlands and the trends of LST in the megacity of Dhaka. The results ...

By protecting, restoring, and integrating natural ecosystems into the fabric of the city, NbS promises not only climate resilience but also social, ...

Despite the growing interest, scant information on large-scale solar power generation especially in rural and

Dhaka Wetland solar System

inaccessible locations is available in the public domain. Hence, the primary ...
