In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...

We're on a journey to advance and democratize artificial intelligence through open source and open science.

True story: A Texas solar farm cut 15% off storage costs by using old EV batteries. Sure, they're like used car parts - but at \$0.18/Wh for second-life cells, who's complaining?

The residential storage market is predominantly composed of fully integrated storage kits, which include Li-ion battery packs, inverters, field wiring, disconnect, and casing.

The Story of Rosa Jackson Rains a lady born in 1900 that traveled in a covered wagon. Written by Franklin T. Wike Jr. Shown above is a photograph of the first car that Rosa ever drove. It was taken ...

A comprehensive list of companies available on stock exchanges that can be browsed alphabetically, by sector, or by country.

Energy storage acts as the ultimate matchmaker in this electricity dating game. The National Renewable Energy Laboratory (NREL) reports that utility-scale battery costs have dropped 72% since 2015, but ...

Add in fully loaded costs and they're probably around \$0.28-0.32 per watt all-in before tax credits. They sell for \$0.30-0.36 per watt depending on geography and contract terms. Do the math: ...
