OverviewElectricity in the Republic of IrelandIsland systemElectricity in Northern IrelandSee alsoExternal linksElectricity generators in the Republic of Ireland are ESB, SSE, Synergen (70% ESB), Edenderry Power, Endesa-Ireland and Huntstown (Viridian). ESB owns the transmission and distribution networks. The transmission system operator is EirGrid plc, which assumed the role from ESB Networks on 1 July 2006. EirGrid ensures the safe, secure and economic operation ...

Powering Up Dublin will enable the city's grid to use the electricity generated from offshore wind energy to the heart of the city. This is a vital step towards ...

Ireland is lucky that our geography supports significant renewable energy potential across onshore wind, offshore wind, solar PV, and biomethane. Developers are keen to invest and there is a rapidly ...

We're literally paying to heat the great outdoors. The main culprit here is poor insulation. A shocking amount of Irish homes are not properly insulated, especially when it comes to the attic. ...

The Irish energy and infrastructure landscape experienced a transformative year in 2025, marked by pivotal regulatory decisions, major project milestones and policy developments across ...

Need to do a quick solder of some plastic on the top of my headphones and obviously can't do that indoors. Live in an apartment so I am wondering if anyone knows of any public spaces with outdoor ...

Renewable energy comes from natural sources that are continuously replenished by nature and is, therefore, a more sustainable alternative to our dependency on fossil fuels.

Ireland's electrical distribution system - the grid - is now creaking under the pressure of handling the rapidly growing supply of electrical power ...

Learn which adapters and converters you need to safely use your devices in Ireland power plugs. Essential tips
