Inspired by Global Problem Solvers: The Series, in this lesson plan, your students will research and design a solar power system for a mobile classroom that can ...

Explore renewable and non-renewable energy, with a focus on solar power. Follow along with a detailed diagram illustrating how solar panels convert sunlight into ...

Students will model solar energy inputs at different locations, analyze the cost-effectiveness of installing solar panels, and determine the appropriate locations for solar panels.

Within these pages, you'll find accessible lesson plans, hands-on experiments, and suggested readings to deepen understanding. Through exploration of renewable ...

Find solar generation lesson plans and teaching resources. Quickly find that inspire student learning.

Students design and build a model city powered by the sun! They learn about the benefits of solar power, and how architectural and building engineers integrate photovoltaic panels into the ...

Solar energy can be used to heat our homes, heat water, cook our food, and power our lights. These science projects will help you learn about solar energy and how it works.

Students may know a little about solar energy, as some of their homes may use solar panels for heating or cooling purposes. The following projects allow students to set up their own investigations and ...

A collection of lesson plans, trainings, and solar curricula ideas for educators.
