-----

China's first megawatt iron-chromium flow battery energy storage demonstration project, which can store 6,000 kWh of electricity for 6 hours, was successfully tested and was approved for ...

ESS iron flow technology is essential to meeting near-term energy needs. Demand from AI data centers alone is projected to increase 165% by 2030 and electricity ...

The technology is being increasingly considered as a long-duration energy storage solution to support renewables deployment on grids. China continues to dominate large-scale ...

Long-duration energy storage solutions provider Sinergy Flow has closed a late-seed funding round, raising EUR 7 million (USD 8.25m) to expand its team and advance the development ...

Flow batteries store energy in liquid electrolytes, and legacy oil and gas infrastructure, such as decommissioned fuel tanks and chemical storage ...

Discover 20 hand-picked Flow Battery Startups to Watch in 2025 in this report & learn how their solutions impact your business. These solutions ...

With a goal to speed the time to discovery of new grid energy storage technology, the team designed a compact, high-efficiency flow battery ...

Earlier this week, Quino Energy announced a partnership with the clean energy developer Long Hill Energy Partners, towards the goal of installing its first commercial-ready flow ...

Technology provider Dalian Rongke Power (Rongke Power) and infrastructure developer China Three Gorges Corporation (CTG) have brought ...
