Design safe, quiet exhaust systems for diesel generators. Control noise, back-pressure, and heat with proper sizing, routing, and silencer selection.

Legend Silencers and Exhaust Systems Silencer and Exhaust System Selection KD700-KD750-KD800-KD1000-KD2000-KD2500 No. of Weld Flange Kits Kohler Co. offers silencers rated for hospital, critical, residential, and industrial applications and stainless steel flexible exhaust connectors for unhooded generator sets. The accessories described in this spec sheet apply to open units unless otherwise stated. These silencers withstand exhaust flow pressure and temperature without creating exc... See more on resources.kohler.com DuraVent [PDF] D-193\_DuraStack\_Spec\_Generator Exhaust\_06-09-17.docx Specification requirements shall be met by using DuraVent DuraStack Models DAS, DIS exhaust flue or equivalent as approved by the engineer. Equivalent submittals shall demonstrate that the alternate ...

Chapter 8.1 of NFPA 37 on the Design and Construction of Engine Exhaust Systems addresses the requirements for engine generator exhaust and provides a few simple guidelines for the exhaust ...

Section 23 51 00 specifications for Generator Exhaust Systems. We look forward to providing the support you need.

Provide factory-built exhaust system that is tested, listed and labeled by the Underwriters' Laboratories, Inc. for use with burning gas or liquid as described in NFPA-37 and NFPA-211, which produce ...

During the initial exhaust system design, our engineers evaluate gas flow and maximum back pressure specifications from your generator manufacturer to determine the correct exhaust pipe sizing.

Exhaust piping must be terminated safely outside a structure that houses a generator, in such a way that hot gases and sparks will be discharged ...

# Generator exhaust specifications

PowerStack is a state-of-the-art twin-walled exhaust system designed to convey power generator exhaust. 22 internal diameters ranging from 4 inch (100mm) to ...
