-----

With over 260 PV module manufacturers in China, 35.4 GW of PV products were exported in the first five months this year, representing a 34 per cent year-on-year increase.

Residential PV in China saw a significant decline in 2024. According to the NEA, only 6.9 GW of residential PV capacity was added in the first quarter ...

Top five! Chint power has won the 365 global photovoltaic ranking list!

Founded in 2009 CHINT Green Energy Clean energy solution provider devoted in the new energy development, construction, operation, and services, as well as ...

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than ...

China is now building at even higher elevations in mountain valleys on the Tibetan Plateau, although with smaller solar farms. Near Lhasa, the ...

Discover all statistics and data on Solar energy in China now on statista !

The 200MW photovoltaic project of China National Nuclear Power's Sanmen Jiantiao East Phase I has been successfully connected to the grid, marking a new breakthrough for the company in its "nuclear, ...

Our experienced and driven team has therefore been actively developing, financing, realizing and operating solar parks in Europe for many years. We have already ...

photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.
