-----

Enter the Eastings and Northings coordinates of two points into the calculator to determine the distance between them.

Station - Distance Measuring Tangents, Horizontal Curves, and Vertical Curves Sight Distance Slope/Grade Effects on Stopping Sight Distance A station is a unit of distance. One station is equal to 100 feet. Station numbers are used to reference locations of various roadway features in design plans and right of way maps. For example, where a curve starts and ends, where a drainage structure is to be constructed, and where a utility pipe is to be buried. Stations expressed in a design plan...
