India Marching Ahead in Solar Energy Growth in Solar Installed Capacity (MW) as on 11.02.2025 Figures and Statistics

India is endowed with vast solar energy potential. About 5,000 trillion kWh per year energy is incident over India's land area with most parts receiving 4-7 kWh per sqm per day. Solar photovoltaic power ...

Summary: India is positioning itself as a global solar powerhouse, targeting 500 gigawatts of renewable energy by 2030. Key players like Waaree, ...

As of January, 2025, India's total solar capacity installed stands at 100.33 GW with remarkable growth trajectory (see infographic). 84.10 GW is ...

Indeed, in 2023, India was the third-largest solar energy producer in the world, adding over 16.6 GW of new solar installations. This growth is driven ...

Explore everything you need to know about solar power generation in India--opportunities, challenges, and growth potential.

India's rooftop solar deployments more than doubled in 2025, reaching a cumulative of 20.8 GW after 7.1 GW of new installations were put on stream, new data by Mercom India Research shows.

India has achieved a historic milestone by surpassing 100 GW of installed solar power capacity, reinforcing its position as a global leader in renewable energy.

India's energy transition is one of the defining stories of the global clean energy narrative. As of late 2025, India's installed renewable energy capacity had crossed 250 GW, driven primarily by ...
