Some discussion on the benefits of integrating hydrogen into microgrids, comparisons with existing microgrids, practical design considerations, and challenges in the microgrid control system is also ...

We are a research group with state-of-the-art laboratory located in Downtown Chicago at University of Illinois at Chicago. IPEG lab is equipped with various modern equipment and is growing.

The Institute of Electrical and Electronics Engineers (IEEE) is developing the necessities and processes necessary to properly incorporate DPRs into current energy systems to ...

The Intelligent Grid Experimental Facilities at IERC - Tyndall offer a virtual living lab for low-voltage microgrid research, integrating detailed modelling, real-time ...

Her research interests include advanced control, optimization and artificial intelligence application of sustainable power systems, microgrids and power converter systems.

Reviews microgrid architecture, key components, and control strategies. Highlights various AI models along with their challenges and advantages. Presents AI applications in sizing, control, ...

This white paper focuses on tools that support design, planning and operation of microgrids (or aggregations of microgrids) for multiple needs and stakeholders (e.g., utilities, developers, ...

Intended for use in the early stages of the design process, MDT uses powerful search algorithms to identify and characterize alternative microgrid designs in ...

At Illinois Institute of Technology we have our own microgrid that integrates a high-reliability distribution system, smart metering, and renewable energy sources to boost overall efficiency, demand ...
