A University of Maryland student team has succeeded in lifting a ...

On August 26, 2016, with pilot Michelle Mahon at the controls, the Solar Gamera made two flights, these being the first ever made by a piloted solar-powered helicopter.

Ultimately, the consensus is that while a solar-powered helicopter is improbable with existing technology, redesigning a helicopter from the ground up may yield possibilities for future ...

Learn what to look for in solar powered aircraft, including feasibility, types, key specs, and realistic use cases for helicopters and planes.

First Solar Powered Helicopter that actually flies! Light/Optical/Wave levitation, Tesla's non-Hertzian, longitudinal wireless wave, &quot;fireball,&quot;&quot;carbon butto...

A team of University of Maryland engineering students built a completely solar-powered helicopter with a pilot.

A team of undergraduates at the University of Maryland has developed a four-rotor helicopter equipped with an array of solar panels. The craft took to the air for nine seconds, lifting more than a foot off of ...

Though this solar-powered helicopter, called Solar Gamera, can only fly for a short distance, but its researchers said that it is already a historical milestone whether ...

I don't believe there are any solar powered aircraft toys, but there is a such thing as a solar balloon which if used properly, will stay up virtually as long as there's sunlight.
