News about switching to greener energy sources is always good news, and this certainly counts: The world's largest wind turbine constructed to ...

In 2023, the average rotor diameter of newly-installed wind turbines was over 133.8 meters (~438 feet)--longer than a football field, or about as tall as the Great Pyramid of Giza. Larger ...

This is a list of the most powerful wind turbines. The list includes wind turbines with a power rating that is within 5 MW of the current most powerful wind turbine that has received customer ...

List of largest wind turbine models, based on rotor diameter and wind turbine sizes. Learn how different models of wind mills impact energy production.

As one of the most installed turbines in the United States--including the largest wind project in the Western Hemisphere (see video below)--GE Vernova's 3 ...

Explore the top 13 largest wind farms in the world by capacity, with key facts, stats, and global clean energy insights.

With a capacity to generate 15 megawatts of power, the Vestas V236-15.0 MW is the largest and most powerful wind turbine as of 2025 to have ...

A close-up look at the biggest wind turbines developed so far, by Windpower Monthly's associate editor James Quilter.

The rotor swept area for 116 m diameter of 10,568 m², the largest in the market of any 3 MW wind turbine, will suit lower wind speed sites. Electricity is generated ...

The Large Tulip Wind Turbine is our biggest tulip turbine to date. With a 5-meter blade height, the Large

Large wind turbine generator

Turbine can provide power from large commercial properties to data centers.
