-----

Polymer-dispersed liquid crystal (PDLC) switchable glass is a cutting-edge smart glass technology revolutionizing modern architecture and interior design. These advanced glazing ...

Liquid Crystal Smart Glass is an innovative technology that enables adjustable transparency and opacity in glass, enhancing aesthetic appeal and energy efficiency in various ...

Our CLEAR Solar Photovoltaic Window Glass can be combined in layers with our other high tech glass technologies for the ultimate in customization! Call or email ...

Scientists have created a transparent solar coating that turns ordinary windows into clean energy generators without affecting clarity. Using cholesteric ...

With eyrise solar control glass, the switching of the liquid crystal molecules from maximum to minimum light transmission is a physical process ...

LC and SPD Smart Glass are renowned in the architecture industry for their range of useful applications. However, while they are both classified as Active Smart Glass, meaning they require an electrical ...

High temperature capability, easiest flow. Suitable where very thin walls are required. Used for broad range of SMT applications, with minimal dimensional change. 30% glass filled.

Looking for dynamic windows ready to use? Discover our product line for dynamic liquid crystal windows, designed with licrivation&#174; technology inside.

What is Liquid Crystal Glass? At its core, Liquid crystal glass is a type of smart glass that uses liquid crystal technology to help you switch ...

Scientists at Nanjing University have developed a transparent, colorless solar coating that can be directly

applied to glass. This converts ...
