A photovoltaic ("PV") macro-module for solar power generation includes a plurality of solar cell strings disposed within a laminated support structure. The solar cell strings generate...

2025 has been a challenging year for renewables. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax ...

Sactec Solar's Macro and Micro Solar product series provide sustainable alternative solar energy solutions for remote, off-grid, life critical, and emergency applications.

Examining the variables of cost, baseload power and intermittency, and land use, we evaluate the tradeoffs among policy support for utility-scale, commercial and residential solar systems.

Offering global and local data, our Renewables & Power Solution comprises a power asset database that enables you to analyze the power generation ...

When the power grid was designed, the only way to generate power in a cost effective manner was to build huge power plants that serviced large regions. These plants were built by ...

Despite the changing market and policy conditions that the solar industry has faced this year, solar will remain the dominant power source added to the grid in the next five years.

New solar energy generation is drastically needed as a source of clean electricity as the U.S. and the globe make the transition away from fossil fuels. Yet, even as solar costs have ...

With the novel model, an optimising configuration approach has been developed to predict the performance of a partially shaded PV array, and ...

Macro-Solar Technology Co., Ltd. has two main businesses: one is the research and development and

production of solar photovoltaic modules
