Independent lab testing of a Donut Lab "Solid-State Battery" cell by Finland's VTT shows it's indistinguishable from the NMC cell it may very well be.

VTT testing says Donut Lab's "solid-state" battery likely matches lithium-ion; energy density measured at 298 Wh/kg, claims look overstated

Donut Lab commissioned the internationally recognised Technology Research Centre VTT to measure the features of the first serially producible solid state battery under independent research ...

At CES, Donut Lab presented a solid-state battery allegedly ready for mass production. However, the impressive specifications prompted critics to question the results. Donut has now ...

Donut Lab releases first independent VTT test results for its solid-state battery, confirming 11C fast charging to 80% in 4.5 minutes. But energy density and cycle life claims remain unverified.
