The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 ...

China is the leading country in terms of cumulative wind installations and newly installed wind power capacity. In 2024, the Asian country added ...

In 2017, a total of 15,680 MW of wind power was installed, representing ...

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to the latest EIA data.

Installed wind power generating capacity has increased substantially in the United States over the last 25 years, growing from 2.4 gigawatts (GW) in 2000 to 150.1 GW in April 2024.

Using three different sources of data and turbine power calculated for more than 126,000 sites in the United States, the toolkit provides powerful information for ...

Wind industry installed a record 117 GW of new capacity globally in 2024, and GWEC forecasts almost 1TW of additional installations by 2030.

Cumulative installed wind energy capacity including both onshore and offshore wind sources, measured in gigawatts (GW).

A report from a leading wind power trade association said a record 117 GW of new wind energy generation capacity was installed worldwide last ...
