The 3.35MWh Liquid-Cooled Energy Storage Container is a high-capacity solution for efficient power management, using safe and durable Lithium Iron Phosphate (LiFePO₄) cells.

Our technology stack unites advanced power electronics, battery storage and proprietary control software. Together, they power every custom energy solution ...

While the state had aggressive goals to invest in large-scale energy storage systems, it doubled down on the strategy in 2021 to reinforce supply ...

The latest capacity breakthrough was made possible by the use of large-capacity cells, system integration, compact design, and further ...

The EnerC+ container is a modular integrated product with rechargeable lithium-ion batteries. It offers high energy density, long service life, and efficient energy release for over 2 hours. Individual pricing ...

Megapack is a utility-scale battery that provides reliable energy storage, to stabilize the grid and prevents outages. Find out more about Megapack.

In response to fast-growing global energy demands, from AI-driven data centres to industrial electrification, TENER Stack is engineered to help ...

This groundbreaking solution marks a strategic leap in capacity, deployment agility, safety, and logistics efficiency, setting new benchmarks for the energy storage industry.

This report is one example of OE's pioneering RD& D work to advance the next generation of energy storage technologies. OE partnered with ...

One-stop empowerment for ultra-large energy storage containers

Compared to traditional 20-foot container systems, TENER Stack improves volume utilization by 45% and energy density by 50%, with a single ...
