The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

Solar parks often termed solar farms or photovoltaic stations referred to development areas where solar power generation is done on a larger scale. ...

According to the report "Record Chinese overseas power project completion in 2024: Update on the Belt & Road Initiative," 52% of these projects ...

The project covers approximately 177 hectares and primarily includes a 100MWac solar power plant. It connects to the existing 220kV substation in the local area through a newly built ...

Explore high voltage battery packs, wall mounted lithium batteries, and ESS cabinets from Hoenergy -- your 2025 Global Tier 1 Energy Storage Provider.

The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid. Wiki-Solar reports total global capacity of utility-scale photovoltaic plants to be some 96 GWAC which generated 1....

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Overseas solar power stations

Data and information about power plants and their location across the globe, plotted on an Interactive world map
