The Philippines government has announced that large-scale renewable energy installations will have to integrate energy storage.

By combining solar power with large-scale battery storage, the plant can offer firm and dependable energy, a first for a project of this magnitude in the Philippines. This proactive approach ...

The world's largest solar-plus-storage project has made a critical achievement that confirms system readiness and safe connection to the Luzon grid. Meralco PowerGen Corporation ...

The MTerra solar project features a planned 3.5 GW solar and 4.5 GWh battery energy storage system (BESS) being built on the island of Luzon, which is set to be the world's largest ...

The Department of Energy (DOE) has issued Department Circular No. DC2026-02-0008, which requires variable renewable energy (VRE) power plants to be integrated with energy storage ...

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting the ...

The move is expected to enable higher renewable energy penetration while preserving power quality and system reliability -- two critical concerns as solar and wind capacity continue to ...

The power generation arm of the Philippines' largest private electric distribution provider, Manila Electric Company (Meralco), is developing its ...

After a year of continuous development, Meralco PowerGen Corp. (MGen) announced that the large-scale solar facility, which stretches across multiple municipalities, has finally been ...

Philippines Power Grid Energy Storage Project

The policy marks a significant shift in how the Philippines manages the inherent intermittency of solar and wind power. By mandating "batteries" or other storage technologies, the DOE aims to ...
