Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The ...

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic ...

View an interactive map or download geospatial data on solar photovoltaic supply curves.

Explore the latest solar market insights and policy updates in all 50 states and Washington, D.C. All market data is current through Q3 2025. California leads as the top solar state. With over ...

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

The Hosting Capacity map gives an indication of how much generation may be added to an area.

Obtain a review of solar, storage, and other DER generation projects in New York State that received funding through NYSERDA. This dataset also includes detailed information each of ...

Map of states with at least one public hosting capacity map useful for integrating renewable and efficient energy into utility distribution systems. ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Explore where you can connect Distributed Energy Resources (DER), such as solar or battery storage, to the power grid without triggering infrastructure upgrades.
