Access high-resolution static maps to visualize global solar potential. For site-specific prospecting and bankable project analysis, use our ...

Free and open access to photovoltaic (PV) electricity generation potential for different technologies and configurations. Available in English, French, ...

The following distributed energy resource maps, calculators, and screening tools are a good place to start; however, be sure to consult an expert for a ...

Solar Energy: Mapping the Road Ahead - Analysis and key findings. A report by the International Energy Agency.

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated ...

This report aims to provide findings for high-level comparisons between countries and regions on their solar energy potential and is intended to ...

Utilize Google Maps Platform to deploy solar installations faster with solar data, solar insights, and rooftop imagery all in one place.

View an interactive map or download geospatial data on solar photovoltaic supply curves.

See if the electric circuits around your project are suitable for new solar capacity. Enter your project location into our interactive service ...
