The IEA-PVPS 2025 Snapshot of Global PV Markets reveals a pivotal moment for solar power: global PV capacity surpassed 2.2 TW, with more than ...

Global Solar Deployment After significant growth in the first half of the year (H1 2025), China installed 28 GWdc of PV in Q3 2025, down 52%, y/y, after the introduction of market-based pricing reforms. India ...

Thinking about installing solar panels in 2025? This guide explains current system costs, incentives, savings, and technology so you can choose ...

This blog explores how the price and efficiency of solar panels have evolved, current trends, and what these changes mean for those considering ...

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Explore the future of solar in 2025--key trends, new tech, and policies driving global clean energy growth.

Consumer Reports tested 10 models of solar panels, looking to see which models delivered the power as promised and still managed to generate ...

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

We expect this recent solar energy trend to continue in 2025 and beyond, resulting in solar panels with greater energy output per unit area of ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...
