North America's largest privately held independent power producer and energy infrastructure innovator.

The guide covers the construction, operation, management, and functionalities of these power stations, including their contribution to grid ...

The Water Authority and City of San Diego are evaluating the feasibility of developing a pumped storage energy project at the City of San Diego's San ...

The project includes a 1,150-megawatt (MW) solar facility with approximately 3.1 million panels and up to 1,150 MW (4,600 megawatt-hours) of battery storage - enough to power 850,000 ...

The Fengning Pumped Storage Power Station is the one of largest of its kind in the world, with twelve 300 MW reversible turbines, 40-60 GWh of energy storage ...

These projects prove that with smart planning, energy storage power stations aren't just feasible - they're game-changers. Now, who's ready to break ground on the next big one?

Work on critical power components has completed and commissioning is underway at a 100 MWh gravity energy storage system (GESS) near Shanghai, China.

An up to 4,600 MW battery energy storage system (BESS) will be paired with a solar installation of 3 million solar modules providing 1.1 GW of ...

Our number one priority is the safe construction and operation of the Goldendale Energy Storage Project. The project will revitalize a former aluminum smelter on ...
