This study assessed the wind and solar-energy potential in four strategic locations--Juba, Malakal, Wau, and Raga--and revealed significant opportunities for renewable ...

Let's face it - South Sudan's energy sector faces more twists than a Nile River rapid. With only 7% of the population having access to electricity, energy storage containers aren't just metal ...

As South Sudan emerges from the wreckage of civil war, its leaders are beginning to build the nation's electric sector from the ground up.

In this work in progress, we introduce the context of solar energy in South Sudan, and describe the course, the modules designed, and lessons learned.

The 20MW solar facility is capable of supplying power to approximately 16,000 households in Juba, offering a significant reduction in energy prices and enhancing grid stability.

Aptech Africa, solar energy and water solution specialists, recently successfully designed, built and installed the first off-grid solar-battery-hybrid power system in South Sudan.

What are the benefits of a Bess energy storage system? BESS integrates several storage technologies, such as solar power storage batteries, to provide a modular and dependable energy storage ...

Solar panels without storage are like coffee makers without mugs - all potential, no usable energy. This project's batteries ensure that solar energy harvested at noon can power ...

This report looks at the question of electricity access in relationship to South Sudan's conflict and the unique options to help harness renewable ...
