Power generation is provided by solar panels mounted on trackers manufactured in Lesotho, deep-cycle batteries, and a backup generator at each site. The ...

Our study aims to evaluate Lesotho's policy environment in line with improving electricity access by sustainable mini-grids in rural communities and meeting national electrification targets.

The second phase of a pioneering solar mini-grids project in Lesotho is underway following the completion of a pilot project funded by REPP in Ha Makebe village, north-east of Maseru.

Implementation of mini-grid projects as a strategic initiative to electrify the rural areas of Lesotho is in its infancy phase. As a prospective solution for Lesotho's energy supply, there is an urgent need for research to ...

The Government attaches high priority to providing basic energy services to the country's off-grid rural communities as expressed in the proposed National Rural Electrification Fund.

Unlike its African neighbours, Lesotho has no minigrids installed. This project aims to introduce minigrid technology into Lesotho, and demonstrate that they can be ...

Minigrids that STGI supports are delivering real impact and commercial levels of power - recently a truck carrying steel poles for a grid ...

Improving access to modern energy services in rural areas in Lesotho is a top priority. Solar mini-grids offer a reliable, clean, and cost-effective solution for delivering electricity to ...

Lesotho is expanding energy access through a new mini-grid regulation that promotes private investment, strengthens rural electrification, and ...

The primary objective of this project is to enhance electricity access in rural and peri-urban areas of Lesotho in
