-----

SG2524N is available for purchase but is not normally stocked. Image shown is a representation only. Exact specifications should be obtained from the product data sheet. This product ...

Description: REGULATING PULSE-WIDTH MODULATORS. ...

TI's SG2524 is a 40V, Dual 0.05A 450KHz PWM controller with -25C to 85C. Find parameters, ordering and quality information.

The SG2524, and SG3524 incorporate on a single monolithic chip all the function required for the construction of regulating power supplies inverters or switching regulators. They can also be ...

This device can be used for switching regulators of either polarity, transformer coupled DC to DC converters, transformerless voltage doublers and polarity converters, as well as other power ...

This monolithic integrated circuit contains all the control circuitry for a ...

The SG2524 and SG3524 were designed for switching regulators of either polarity, transformer-coupled dc-to-dc converters, transformerless voltage doublers, and polarity-converter ...

It is a 16-pin integrated IC which can be used in applications requiring high power at the output. These IC's are widely used in controlling the speed ...

The SG2524 is a fixed-frequency pulse-width-modulation (PWM) voltage-regulator control circuit. The regulator operates at a fixed frequency that is programmed by one timing resistor, RT, ...
