The U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) conducts research to reduce the cost and impact of siting solar. We've ...

The National Renewable Energy Laboratory team thanks the United States Bureau of Reclamation for the opportunity to develop the Facility-Scale Solar Photovoltaic Guidebook.

PVGIS is a free web application that allows the user to get data on solar radiation and photovoltaic system energy production, in most parts of the world.

A comprehensive solar site assessment determines whether a location can support a profitable solar installation while identifying potential challenges before they ...

A solar feasibility study includes preliminary recommendations for photovoltaic (PV) modules, inverters, racking systems, and energy storage. ...

Assess if proposed array location supports a solar resource potential of more than 75 percent of the optimal solar resource potential for the same location using the online RERH Solar Site Assessment ...

A Comprehensive Review of Solar Photovoltaic Systems: Scope, Technologies, Applications, Progress, Challenges, and Recommendations Published in: IEEE Access (Volume: 13)

Guidance on designing and operating large-scale solar PV systems. Covers location, design, yield prediction, financing, construction, and maintenance.

A framework is proposed as a means to guide siting workflows and standardize how the social and environmental impacts of floating photovoltaic solar installations are assessed.
