We have a 1930s shed style garage that I am hoping to equip with solar panels (in SoCal - lots of sun) to power an outdoor projector, speakers and market lights for movie nights.

You're not alone. Many people face this challenge when setting up projectors for camping, backyard events, or outdoor screenings. This guide will show you different ways how to ...

Beyond traditional electrical sources, solar power offers an increasingly practical way to run your outdoor projector setup while minimizing your environmental footprint.

A plug-n-play solution that can be used as standalone 110v power supply or redundant system with public power. This kit can be connected to existing office containers or any electrical package.

Use a Jackery portable power station to power outdoor projectors where traditional outlets aren't available. Charge the Jackery before the event to ensure uninterrupted movie playback.

An outdoor lighting and projection system that includes a light fixture device and a projector device is disclosed. The light fixture device comprises a display device integrated with a...

A solar panel on a shipping container project integrates photovoltaic (PV) technology into standard shipping containers. These units function as self ...

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power ...

Our systems can be deployed quickly and easily transported to different locations as project needs change. Unlike traditional generators, they ...

Solar container outdoor power can be connected to the projection device

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.
