-----

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

From Texas-sized utility projects to skyrocketing residential battery attach rates, 2026 marks the year solar and storage transition from the electric grid's fastest-growing additions to its ...

Renewable energy integration and decarbonization of world energy systems are made possible by the use of energy storage technologies. As a result, it provides significant benefits with ...

In 2025 there was just 2 GW of battery storage capacity installed, but by 2023 this grew to 89 GW - an increase of 4,350%, the UN report says. The ...

The more solar and wind plants the world installs to wean grids off fossil fuels, the more urgently it needs mature, cost-effective technologies that ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage ...

Solar power has become more affordable and efficient and, combined with storage solutions, will play a vital role in the global clean energy transition.

Solar and battery storage continue to dominate growth among energy sources, while fossil fuels and nuclear power have stagnated. That's ...

As the federal government expressed skepticism about solar, industry executives pushed back with facts on

# Solar energy storage situation

how the cost-effectiveness and deployment speeds of solar and storage projects ...
