This paper explores whether solar energy projects in the Russian energy market can operate without direct state support, given the current economic and geopolitical circumstances, ...

The largest European HJT solar cell and module manufacturer Hevel Group started construction of several off-grid solar PV plants in Russia's Far East. Three stand alone solar power ...

To assess the possibility of meeting the growing demand, we analyzed the availability of production capacities throughout the production chain of solar photovoltaic plant components, as well ...

Considered in the article are the best solutions we propose to improve PV equipment and make it more attractive for agricultural consumers. The developed vertical and planar high-voltage...

A great number of factors determining the development of photovoltaics are associated with the assessment of possible volumes of solar energy use in correlation with the technical and economic...

In order to answer this question, the authors need to assess the economic feasibility of seven scenarios for the construction of a solar power plant in the Orenburg region of Russia.

Solar energy development in Russia has long been sluggish, overshadowed by its fossil fuel economy.

This work is dedicated to the establishing the calculation formulas for solar radiation income definition and to the analysis of operation efficiency of solar plants having different ...

Explore the solar photovoltaic (PV) potential across 34 locations in Russia, from Pevek to Sochi. We have utilized empirical solar and meteorological data ...
