With China implementing major changes to its solar market design this year, a temporary dip in global growth in 2026 appears very likely. Meanwhile, other regions are falling behind, ...

The growing demand for power and electricity generation is driving the growth of the global solar power market during 2020. The supply chain disruptions and halt of manufacturing units ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects ...

Electricity generated by source: Natural gas dipped but still ruled. Electricity generated by natural-gas-fired power plants declined by 3.3% to 1,807,338 GWh in 2025, the second-highest after ...

As it was, the growth of utility-scale solar was only sufficient to cover about two-thirds of the rising demand (or 73 percent if you include wind power).

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates ...

Longer term, the residential solar market will grow at an average annual rate of 7% between 2027 and 2030. Rising retail rates and declining solar costs will drive a recovery in ...

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027.

The demand for alternative sources of power generation and reducing dependence on fossil fuels is expected to boost product demand. To learn more about this ...
