Get high-quality bearings for your solar trackers. Partner with XDL Machinery for precision-engineered, high-durability plastic bearings tailored to solar tracking applications.

These tracking systems allow PV panels to follow the sun throughout the day, generating maximum energy. The key component that allows these systems to move is the solar tracker bearings.

GGB bearings significantly reduce friction, minimizing wear and extending the lifespan of components even under harsh operating conditions, ensuring ...

Bearings are key to a tracker's ability to follow the sun smoothly and accurately, producing the most energy with the least possible maintenance. An ...

Solar tracker bearings from Poly Fluoro Ltd allow for the rotation of solar panels so that their angle is maximised in relation to the sun. This improves the efficiency of the solar plant and significantly ...

This advanced spherical bearing is designed with a 15° side-view tilt capability, allowing solar trackers to seamlessly adapt to challenging landscapes and handle north-south slopes up to 15°.

The specific low wear, low friction behavior of MN527 facilitates smooth function of the bearing and does not need frequent greasing or maintenance that is required with metal bearings.

WO2023141355 - BEARING HOUSING ASSEMBLY FOR SOLAR TRACKERS.
