-----

Don't want to start using/discharge the battery until say 10am. Basically it would be flat by 6 or 7am, often 5kwh - 10 kwh overnight until the day warms up. A big part of the reason for batteries ...

Hi, I very recently got solar panels with a Solis inverter (S5-EH1P6K-L). All was going good - batteries charging up when excess sun - until I changed the inverter mode to Self Use in order ...

I'm not that familiar with Solis inverters, but the problems sound similar to what you would see if the batteries were cold, or the Inverter's charge voltage limit was set too low. You tend to see ...

The inverter doesn't tend to be the issue - they'll work just fine at very low temperatures, and can supply pretty much whatever charge rate your batteries ...

In this ultimate Solis inverter troubleshooting guide, we will discuss common problems that can arise with Solis inverters and provide step-by-step ...

hi, we had solar panels, an inverter and pure drive battery fitted. So far we have used a fraction of electricity produced. The battery does not charge or discharge.

No Battery Power SupplyA Dead BatteryLow Battery VoltageLoose WiringBlown FuseTips and WarningsConclusionAn inverter charger is a versatile system, able to charge batteries and run appliances. However there will be times when the charging simply will not work. By following the tips in this guide you should be able to get it running again. ## Solis inverter not charging battery

Inverter stuck in idle mode-battery cannot chargeSee MoreMeasure the voltage of each battery individually. For the master battery, adjust the DIP to 4 before start the batteries and connect the Y-plug to short circuit.

On the underside of the inverter the DC switch needs to be reset to allow the energy produced by the panels to continue to flow. Please turn this 90° anti-clockwise to do so.
