-----

A solar generator is a device that harnesses sunlight to produce electrical power using solar panels. These generators typically consist of photovoltaic cells that ...

Most of the data is taken from the European Commission's Eurostat annual data. This dataset contains yearly electricity generation, capacity, ...

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

Participants are required to use the provided dataset to analyze, visualize, and predict solar energy generation and weather patterns. The goal is ...

Access detailed PDF datasheets for Mobile Solar's generators and arrays, providing specifications to help you choose the right system.

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

Lawrence Berkeley National Laboratory (Berkeley Lab) estimates hourly project-level generation data for utility-scale solar projects in the seven organized wholesale markets and 18 additional Balancing Areas.

California Distributed Generation Statistics (DGStats) is the California Public Utilities Commission's official public reporting site of all distributed generation ...

PV-Live: This dataset provides real-time data on solar energy generation in the United Kingdom. It includes data on the total amount of solar energy generated, ...

The survey Form EIA-860 collects generator-level specific information about existing and planned generators and associated environmental equipment at electric power plants with 1 ...
