“Our latest project with Aarhus Municipality stores enough energy to power 600 homes for 24 hours - equivalent to 12,000 electric vehicle charges,” explains an EK SOLAR engineer.

The Sunshine Energy Storage Fund is designed to harness the potential of renewable energy technologies, specifically focusing on energy storage solutions that enhance ...

Situated on Pier 129, the 16 mW installation offers connections at both the fore and aft ends to accommodate different hookup locations on various ships. The pier can handle one ship at a ...

This article explores cutting-edge energy storage solutions, their applications across industries, and why Danish projects set global benchmarks. Learn how advanced storage systems enable grid stability ...

2023 marked the year when Denmark's first shore power facility for cruise ships was unveiled at the Port of Aarhus. Now, cruise ships can turn off their diesel ...

Port of Aarhus, Denmark's largest commercial port, opened its first shore power facility for cruise ships on June 20, 2023 enabling the vessels to keep their engines running on electricity while ...

Denmark's ambitious Aarhus energy storage project is set to begin construction in the Havnager district, a strategic location near Aarhus Port. This area was chosen for its existing energy infrastructure and ...

Aarhus aims to become carbon-neutral by 2030, a goal that relies heavily on integrating wind and solar power into its grid. However, renewable energy intermittent nature creates challenges.

This article explores the project's technical framework, environmental benefits, and its role in Denmark's
