This is a list of U.S. states by total electricity generation, percent of generation that is renewable, total renewable generation, percent of total domestic renewable generation, and carbon intensity in 2024. The largest renewable electricity source was wind, which has exceeded hydro since 2019.

Learn about these states' solar projects, key factors behind their success, such as pro-solar policies, abundant sunlight, and economic ...

Discover the best states for solar power production in the country with our February Solar Energy Generation Report. Where does your state rank?

California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and ...

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...

Find out which states are leading the way in solar electricity generation, and why they're doing so well while some other states fail to meet ...

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

Discover which U.S. state generates the most solar power and how solar capacity varies nationwide.

Interactive map of solar farms in the US. View the largest projects, track new developments, and explore capacity data across all states.
