What's actually the difference between `String[]` and `String...` if any? The convention is to use `String[]` as the main method parameter, but using `String...` works too, since when you use `varargs` you can call ...

`String = new String[10]{}; //The line you mentioned above Was wrong because you are defining an array of length 10 ([10]), then defining an array of length 0 ({}), and trying to set them to the same array ...`

That `String[]` args part may become optional in future versions of Java. Work is underway to allow for simplified declaration of main method. See JEP 463: Implicitly Declared Classes and ...

7 `String[] errorSoon = new String[n];` With `n` being how many strings it needs to hold. You can do that in the declaration, or do it without the `String []` later on, so long as it's before you try use them.

6 One thing that is not covered here is that it depends if we compare string to c string, c string to string or string to string. A major difference is that for comparing two strings size equality is checked before ...

String Literals: Moreover, a string literal always refers to the same instance of class `String`. This is because string literals - or, more generally, strings that are the values of constant expressions ...

I want a string of fixed length, composed of characters picked randomly from a set of characters e.g. `[a-zA-Z0-9]`. How can I do this with JavaScript?

`String` stands for `System.String` and it is a Framework type. `string` is an alias in the C# language for `System.String`. Both of them are compiled to `System.String` in IL (Intermediate ...

How might I convert an `ArrayList<String>` object to a `String []` array in Java?
